Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in August 2007 and no WBCR was observed. No interviews were conducted during the survey. Fishing tackle was found at Site 5. One comment was received during the public comment period of May 21-August 31, 2008, which cited secondary contact recreation.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 4 out of 7 sites evaluated and was close at all others. The stream was close to meeting the median depth criterion at 2 of the 7 sites evaluated. Due to meeting the maximum depth criterion, the committee recommends the WBCR use designation be retained. Due to evidence of secondary contact (fishing tackle, comment), the committee recommends Secondary Contact Recreation be assigned.

☐ Add Use ☒ Retain Use ☐ Remove Use  
☐ Modify Use ☐ Inconclusive
